

Walking Rules to keep us all safe and make sure we look after the environment

There will always be a leader in front and somebody at the back. Don't go ahead of the leader or behind the back stop person.

Don't drop any litter - put it in your bag or your pocket and get rid of it later.

Always cross the road with an adult, even if you are old enough to cross on your own, as the younger children will copy what you do.

Shut gates after the last person has gone through so cattle and sheep don't escape

When there is no pavement, walk on the right hand side of the road and keep in to the edge. If you see a car coming shout "Petrol!" to warn everybody to keep in.

When we stop for lunch or to play, don't go outside the boundary we have agreed on and when you hear the horn sounding it means we all need to gather together again.
